## **General Information**

### What is SmarterMail?

SmarterMail is an award-winning mail and collaboration server that easily meets the needs of any sized business, from the individual proprietor to large corporations and enterprise organizations. Features include:

- A rich webmail interface optimized for desktops, tablets and "phablets"
- A mobile interface ideally suited for smartphones
- An integrated instant live messaging system that can be used right from the Web interface or integrated with third-party products like Adium, Pidgin or IM+
- Full collaboration and groupware features (shared contacts, calendars, tasks and notes)
- File storage
- Detailed reporting at the mailbox, domain and system levels
- Email and chat archiving, ideal for complicancy requirements
- Intrusion detection/prevention
- Advanced synchronization with third-party email clients (Apple Mail, Microsoft Outlook, Mozilla Thunderbird, etc.) and mobile devices (Android, BlackBerry, iOS, Windows Phones, etc.)
- Structured and multi-layered antispam and antivirus tools included at no additional charge
- Optional add-ons for Microsoft Exchange ActiveSync, Exchange Web Services, Message Sniffer, Cyren Premium Antispam and Cyren Zero-hour Antivirus
- Failover functionality
- And more...

With lower hardware requirements, superior stability and reduced maintenance costs, SmarterMail has significantly lower TCO and is the best-in-class Microsoft Exchange alternative for businesses and hosting companies.

# SmarterMail Edition Explanation

## Professional Edition vs. Enterprise Edition

SmarterMail Professional Edition has all of the features required to host a fully-functional mail server. SmarterMail Enterprise Edition offers additional features, including:

- Failover functionality
- Ability to mark a domain as hosted externally
- Remote wiping of mobile devices

- Support for auto-discovery
- Scheduling Assistant support in Outlook for Mac (and future Outlook versions that support EWS )
- Advanced collaboration: shared calendars, contacts, tasks and notes
- LDAP support
- Message prioritization and throttling
- Active directory authentication
- Email and chat archiving for SOX, HIPAA or other regulatory requirements
- Over-the-air synchronization for Android, BlackBerry, iPhone and Windows Phones
- Two-way synchronization for Microsoft Outlook
- Mailing list management functions
- Custom and emailed reports
- The ability to purchase and integrate one, or all, of the following licensed add-ons:
- Microsoft Exchange ActiveSync for mobile and desktop (Outlook 13) synchronization
- Microsoft Exchange Web Services for Apple desktop client synchronization (Outlook 11 for Mac, Apple Mail)

#### SmarterMail Free

SmarterMail Free contains much of the same functionality as SmarterMail Enterprise, but is limited to one domain with up to 10 users. This is to give you an opportunity to try all of the features out before making a decision on what product to purchase.

## **SmarterMail Edition Comparison**

You can also refer to the following edition comparison chart for more information about each edition.

| Features              | 1 Free                   | Pro | Enterprise |  |  |  |  |

<sup>1</sup> Icewarp pricing based on the cost of 450 mailboxes as of March 3, 2011, as pricing information is no longer available directly from their website.

- 2 Exchange 2010 Enterprise pricing as of March 3, 2011, as pricing information is not available on the Microsoft website, and includes Enterprise Client Access Licenses (CALs) for 500 users.
- 3 Exchange ActiveSync license required for every mailbox.
- 4 Included with Enterprise CAL.
- 5 Included with Enterprise CAL.

- 6 Available with the inclusion of Sharepoint Server at an extra charge (licensing varies).
- 7 Available at a substantial extra charge.
- 8 SmarterTools provides two email support incidents with every purchase.
- 9 Available at a substantial extra charge.
- 10 Emergency support is available if needed and is part of the Platinum Support Package. More information about our support packages can be found on the Support page of the SmarterTools website.
- 11 Icewarp provides 30 GroupWare, 30 instant messaging, 30 SIP, 30 SMS, 5 Outlook connectors, 5 SyncML, 5 desktop client and 5 Exchange ActiveSync licenses at no cost by deducting \$628 from the total cost at checkout. This discount is reflected in the product's total cost in the chart above.

## How SmarterMail Works

There are three main components that work together within SmarterMail: the Web interface (and a complementary mobile interface for smartphones), the Windows Service, and the SmarterMail web server.

#### **Web Interface**

From an administration standpoint, the Web interface can be used by both system admins and domain admins to magage all functions of the entire mail server as well as individual domains and user accounts. In addition, it offers end users a versatile, yet light weight, method of accessing their mailboxes, calendars, contacts and more using any standard Web browser. Note: In addition to using the Web interface, end users are able to use a desktop application such as Outlook, Apple Mail, Thunderbird, etc.

SmarterMail also provides a mobile interface that was designed specifically for smartphones. This is a light, yet fully functional interface that allows SmarterMail users to access their email, contacts, calendars, tasks and notes regardless of their location and connection speed.

#### Windows Service

The SmarterMail Service is the backbone of SmarterMail. Running as a Windows Service, it controls data storage and retrieval, protocol services, and administrative functions. SmarterMail will not function without this service installed and running.

#### **SmarterMail Web Server**

The SmarterMail web server installs automatically as part of the standard installation process. This web server gives users and administrators access to the SmarterMail web interface from the Internet by utilizing the IP address assigned to the local machine. NOTE: After installing SmarterMail, it is recommended that the web interface be moved from the SmarterMail web server to Microsoft IIS (if available) for more stability and security. For step-by-step instructions on how to make SmarterMail run under IIS, see Running as an IIS Site .
