Sender Priority Overrides

This feature is only available in SmarterMail Enterprise.

Sender priority overrides allows the system administrator to assign priority levels to specific email addresses. For example, a company may want the mail server to send emails from its support team (support@example.com) before sending emails to mailing lists.

To view the sender priority overrides, click the Settings icon . Then expand the Routing folder and click Sender Priority Overrides in the navigation pane.

To create a new sender priority override, click New in the content pane toolbar. The following options will be available:

- Email Address - The email address of the user or group.
- Message Delivery Priority - The priority level assigned to this user's messages.
- Description - A brief summary why the sender priority override was created.
