Auto-complete

Because most users generally send email to the same people or addresses, SmarterMail automatically pulls email addresses from your Sent Items folder, your contacts, the Global Address List (GAL), aliases and mailing lists and saves the all separately to an auto-complete list. This list is different than your Contacts list as it covers accounts you may not have actual contacts set up for. These auto-saved email addresses are then used to auto-complete the To, Cc and Bcc fields when applicable.

To view the list of email addresses used for the auto-complete feature, click the settings icon . Then expand the My Settings and Advanced Settings folders and click Auto-complete in the navigation pane. A list of email addresses will load in the content pane.

Editing the Auto-complete List

When you bring up the auto-complete list, you will see all of the addresses saved listed by Email Address, Display Name and Source. The source listed will be either one of the following:

- Sent items
- Contacts
- Global Address List
- Alias
- Contacts

You can only delete addresses that were pulled from your Sent Items folder. To do this, simply select the addresses and click Delete in the content pane toolbar. To delete other items you will need to do so from their respective locations within SmarterMail. That is, from your contacts, by deleting aliases, etc.
