## Recurring events

SmarterMail's calendaring allows you to add events that recur over time. Recurring events can include:

- Holidays
- Birthdays
- Anniversaries
- etc.

When adding an appointment (see [Adding an Appointment](#) ), it can be converted to a recurring event by clicking on the Recurrence Information tab. Use the options on the tab to schedule how often an event recurs. Recurrence is very flexible, and can be as simple or as complex as you want. Examples include:

- A birthday that occurs every 7th of August.
- A meeting that happens the second Monday of every month.
- An appointment that occurs every 4 days for up to 3 weeks.
