Help Documentation

[Trend Reports](#)

[Traffic Reports](#)

[Server Status](#)

This report will tell you the amount of memory currently being used on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

[Message Traffic](#)

This report will tell you the number of messages that are being sent and received on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

[Message Data](#)

This report tells you the amount of data which was sent and received in KB on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

[Throttle Traffic](#)

This report shows the number of messages that have been throttled on your server. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The following report items are available:

- Bounces Received - The number of bounced messages throttled.
- Messages Sent - The number of sent messages throttled.
- SMTP Out Bandwidth - The amount of bandwidth throttled.

[Throttle Violations](#)

This report shows the number of throttle violations on your server. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The following report items are available:

- Bounces Received - The number of bounced messages throttled.
- Messages Sent - The number of sent messages throttled.
- SMTP Out Bandwidth - The amount of bandwidth throttled.

Traffic By Priority

This report shows how many messages going through the spool were assigned priority levels. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Bandwidth By Priority

This report shows the bandwidth for all messages in each priority level. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

SMTP In Usage

This report tells you the size of the bandwidth and the number of connections that have been made from SMTP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

SMTP In Errors

This report tells if any errors occurred from SMTP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

SMTP Out Usage

This report tells you the size of the bandwidth and the number of connections that have been made from SMTP outgoing mail from all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

SMTP Out Errors

This report tells if any errors occurred from SMTP outgoing mail from all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

POP Usage

This report tells you the size of the bandwidth and the number of connections that have been made from POP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

POP Errors

This report tells if any errors occurred from POP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

IMAP Usage

This report tells you the size of the bandwidth and the number of connections that have been made from IMAP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

IMAP Errors

This report tells if any errors occurred from IMAP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

IMAP Errors

This report tells if any errors occurred from IMAP incoming mail for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

SpamAssassin Servers

This report shows general data regarding connections to external SpamAssassin servers. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The following report items are available:

- Avg. Active Connections - This is the average number of active connections made by SmarterMail.
- Connections - This is the total number of connections made to a SpamAssassin server.
- Failed Connections - The total number of failed connections to a SpamAssassin server.

SMTP Out Connections

This report tells you the number of SMTP Out connections your server has made.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

ClamAV

This report tells you the number of connections your server has made.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Spam and Virus Reports

Incoming Spam Counts

This report tells you the number of Spam Messages which were received at different tolerance levels on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Outgoing Spam Counts

This report tells you the number of outgoing messages that were blocked due to spam on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Incoming Spam Percentages

This report tells you the percentages of Spam Messages which were received at different tolerance levels on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Outgoing Spam Percentages

This report tells you the number of outgoing messages that were blocked due to spam on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Greylisting

This report tells you the number of connections which were allowed and delayed due to Greylisting for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

Viruses

This report tells you the number of viruses which were received through email for all domains on your server.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The report is broken up into two columns—Day and Viruses.

Security Reports

Abuse Detection

This report shows the number of attacks on the server. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The following report items are available:

- DOS Violations - The total number of DOS violations.
- Harvesting Violations - The total number of harvesting violations.
- Internal Spammer Violations - The total number of spam violations from users on the SmarterMail server.

Blacklist / Whitelist

This report shows the number of connections made from blacklisted and whitelisted IPs. Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The following report items are available:

- Blacklisted Connections - The number of connections SmarterMail made to blacklisted IPs.
- Whitelisted Connections - The number of connections SmarterMail made to whitelisted IPs.
