Hostnames

To get started with Hostnames, click the Manage button on the main toolbar, then select Hostnames from the left tree view.

This feature allows Administrators to assign a hostname for each IP address. For example: IP 1.1.1.1 can assigned to mail.domain1.com and IP 1.1.1.2 can be for mail.domain2.com. Prior to this addition, SmarterMail could only specify one hostname for all IPs.
