

# ClamAV Failure

Help Documentation

## ClamAV Failure

ClamAV is a 3rd party source integrated with SmarterMail to help detect and prevent viruses from entering the system. Administrators can utilize the attributes listed below to notify them when there has been a failure with the ClamAV service.

### Attributes

Time of Day - Enter a time of day to trigger this event.

ClamAV IP - Enter the IP address of the ClamAV server that will trigger this event.

ClamAV Port - Enter the port of the ClamAV server that will trigger this event.

Consecutive Failures - Enter the number of failures that needs to be reached to trigger this event.

File Name - Enter the name of the file to trigger this event.

File Size (KB) - Enter the size of the file in KB that will trigger this event.
