POP Errors

This report tells if any errors occurred from POP incoming mail for all domains on your server. Domain and system administrators may use this report to identify users that are using faulty email clients or unnecessarily using system resources.

Note: Not all reports are available for users and/or domains. Consult your system or domain administrator for report availability.

The following report items are available:

- Bad Commands - The total number of bad commands given.
- Blocked Connections - The total number of connections that were blocked.
- Day - The specified amount of time that the report data falls within.
- Terminations - The total number of terminations that occurred for incoming mail.
