Message Archive Search

This feature is only available to domain and system administrators using SmarterMail Enterprise.

Message archiving is a method of storing all email traffic for a domain in a separate location on the mail server. Typically, this is a feature used for companies that need mail servers in compliance with the Sarbanes-Oxley Act of 2002.

To search the archive, click the manage icon and click Message Archive Search in the navigation pane. System administrators can search for a message by date range, the sender's address, the recipient's address, or the subject.

Domain administrators can also search the archive by clicking email icon and clicking Message Archive Search in the navigation pane.

For more information on archiving, see [Message Archiving](#) .
