Help Documentation

## Trusted Senders

This section allows system administrators to list specific email addresses (such as `jsmith@example.com`) or domains (such as `example.com`) that will be exempted from spam filtering. This can prevent mail from friends, business associates and mailing lists from being blocked and lets the system know that these messages come from a trusted source.

To view the trusted senders list for the server, click the security icon and click Trusted Senders in the navigation pane. A list of trusted senders will load in the content pane and the following options will be available in the content pane toolbar:

- New - Creates a new trusted sender.
- Edit - Edits an existing trusted sender.
- Delete - Permanently deletes the selected trusted sender(s).
