Email Events

Users and system administrators can receive notifications based on the following email events:

- Message Received - Notifies users that they received a new email message.
- Message Sent - Notifies users that the mail server sent a message.

Depending on the event selected, the following event criteria are available:

- To Address - The email address to which the message was sent.
- Alias Name - The alias name that will trigger the event.
- From Domain - The domain from which the email message was sent.
- From Domain - The domain to which the email message was sent.
- Intra Domain - Select this option to trigger the event when an email is sent/received from within the domain.
- Size - The message size in KB that will trigger the event.
- Subject - The words that will trigger the event if found within the subject of the message.
- Spam Level - The spam level of the message that will trigger the event.
- Time of Day - The time frame during which the event occurs.

Depending on the event selected, the following actions are available:

- Add recipient
- Execute command-line
- Send email
- Use default notification profile for user
- Use notification profile
