Help Documentation

## Browser Versions

This report displays the most popular versions of browsers used by your website visitors during the selected date range. Webmasters can use this report to ensure that their website loads properly in all of the browsers used by your visitors. Conversely, if a particular browser version becomes less and less popular, or disappears completely from this report, designers can potentially remove any custom coding added to a site specifically for that browser version.

Note: This report can be added as a report item to a custom report. For more information on report items, refer to [Understanding Report Items](#) .

For a definition of the terms listed on this page, please refer to the [Glossary](#) .
