

# Site Propagation

Help Documentation

## Site Propagation

Use this section to apply Site Defaults to all of the sites in SmarterStats. System admins can opt to propagate all settings, or select individual settings to propagate. For example, if the time zone of the sites needs to change, admins can ONLY propagate that one change.

To access site propagation, click the Settings icon. Then expand the Defaults folder and click Site Propagation in the navigation pane. The default site settings will load in the content pane. To apply some or all of the default settings to all of the sites in SmarterStats, select the appropriate settings and click Propagate Now.
