Log Import Status

This feature is only available to site administrators.

Site administrators can use this page to check the import status of the site's log files. By default, SmarterStats updates the log files every 15 minutes. Site administrators can also use the information provided under the Good Rows and Bad Rows columns to diagnose problems, such as choosing the wrong log file format.

SEO Processing Status

This feature is only available to site administrators.

If a site has any SEO Campaigns set up, Site administrators can use this page to check the retrieval status of the site's SEO statistics. By default, SmarterStats updates the SEO statistics daily. This process starts at midnight and can last several hours, depending on the number of SEO campaigns, keywords, search engines, etc. that SmarterStats is retrieving statistics for. If needed, site administrators can force SmarterStats to update statistics at any time from the SEO section.
