## Geographics

### World Countries

This report shows the traffic from the countries of the world, with the highest activity country being listed first. The countries visitors are coming from are identified by IP address.

#### Terms Used

**Bandwidth** - Bandwidth represents the total number of kilobytes that were sent to people visiting your site. Bandwidth includes all resources requested by the users.

**Hits** - A hit represents a request to your web site for a file such as an image, a web page, or a CGI script. One web page may contain several related resources, and as a result, a visitor viewing one web page may trigger several hits. Hits generated as a result of an error (either a 400 or 500 level error) are not counted as actual hits to your site, and are kept separate from successful hits.

**Page Views** - A page view is a successful request for a file on your web site that is considered to be a page. These usually mean files with extensions such as .txt, .asp, .aspx, .php, etc. Views generated as a result of an error (either a 400 or 500 level error) are not counted as actual views for your site, and are kept separate from successful views.

**Visits** - Visits represent the total number of times people have visited your web site. A visit is counted whenever a web site user requests one or more files from the web server. If the user becomes idle for more than a certain amount of time (usually 20 minutes), a new visit is generated when they come back.

### World Cities

This report shows the traffic from cities around the world, with the highest activity city being listed first. The visitors are identified by IP address.

#### Terms Used

**Bandwidth** - Bandwidth represents the total number of kilobytes that were sent to people visiting your site. Bandwidth includes all resources requested by the users.

**Hits** - A hit represents a request to your web site for a file such as an image, a web page, or a CGI script. One web page may contain several related resources, and as a result, a visitor viewing one web page may trigger several hits. Hits generated as a result of an error (either a 400 or 500 level error) are not counted as actual hits to your site, and are kept separate from successful hits.

Page Views - A page view is a successful request for a file on your web site that is considered to be a page. These usually mean files with extensions such as .txt, .asp, .aspx, .php, etc. Views generated as a result of an error (either a 400 or 500 level error) are not counted as actual views for your site, and are kept separate from successful views.

Visits - Visits represent the total number of times people have visited your web site. A visit is counted whenever a web site user requests one or more files from the web server. If the user becomes idle for more than a certain amount of time (usually 20 minutes), a new visit is generated when they come back.

## **African Countries**

This report shows the traffic from the countries of Africa, with the highest activity country being listed first. The countries visitors are coming from are identified by IP address.

### **Terms Used**

Bandwidth - Bandwidth represents the total number of kilobytes that were sent to people visiting your site. Bandwidth includes all resources requested by the users.

Hits - A hit represents a request to your web site for a file such as an image, a web page, or a CGI script. One web page may contain several related resources, and as a result, a visitor viewing one web page may trigger several hits. Hits generated as a result of an error (either a 400 or 500 level error) are not counted as actual hits to your site, and are kept separate from successful hits.

Page Views - A page view is a successful request for a file on your web site that is considered to be a page. These usually mean files with extensions such as .txt, .asp, .aspx, .php, etc. Views generated as a result of an error (either a 400 or 500 level error) are not counted as actual views for your site, and are kept separate from successful views.

Visits - Visits represent the total number of times people have visited your web site. A visit is counted whenever a web site user requests one or more files from the web server. If the user becomes idle for more than a certain amount of time (usually 20 minutes), a new visit is generated when they come back.

## **African Cities**

This report shows the traffic from the cities and countries of Africa, with the highest activity country being listed first. The visitors are identified by IP address.

## Terms Used

**Bandwidth** - Bandwidth represents the total number of kilobytes that were sent to people visiting your site. Bandwidth includes all resources requested by the users.

**Hits** - A hit represents a request to your web site for a file such as an image, a web page, or a CGI script. One web page may contain several related resources, and as a result, a visitor viewing one web page may trigger several hits. Hits generated as a result of an error (either a 400 or 500 level error) are not counted as actual hits to your site, and are kept separate from successful hits.

**Page Views** - A page view is a successful request for a file on your web site that is considered to be a page. These usually mean files with extensions such as .txt, .asp, .aspx, .php, etc. Views generated as a result of an error (either a 400 or 500 level error) are not counted as actual views for your site, and are kept separate from successful views.

**Visits** - Visits represent the total number of times people have visited your web site. A visit is counted whenever a web site user requests one or more files from the web server. If the user becomes idle for more than a certain amount of time (usually 20 minutes), a new visit is generated when they come back.

## Asian Countries

This report shows the traffic from the countries of Asia, with the highest activity country being listed first. The countries visitors are coming from are identified by IP address.

## Terms Used

**Bandwidth** - Bandwidth represents the total number of kilobytes that were sent to people visiting your site. Bandwidth includes all resources requested by the users.

**Hits** - A hit represents a request to your web site for a file such as an image, a web page, or a CGI script. One web page may contain several related resources, and as a result, a visitor viewing one web page may trigger several hits. Hits generated as a result of an error (either a 400 or 500 level error) are not counted as actual hits to your site, and are kept separate from successful hits.

**Page Views** - A page view is a successful request for a file on your web site that is considered to be a page. These usually mean files with extensions such as .txt, .asp, .aspx, .php, etc. Views generated as a result of an error (either a 400 or 500 level error) are not counted as actual views for your site, and are kept separate from successful views.

**Visits** - Visits represent the total number of times people have visited your web site. A visit is counted whenever a web site user requests one or more files from the web server. If the user becomes idle for

more than a certain amount of time (usually 20 minutes), a new visit is generated when they come back.

## Asian Cities

This report shows the traffic from the cities and countries of Asia, with the highest activity city being listed first. The cities visitors are identified by IP address.

### Terms Used

**Bandwidth** - Bandwidth represents the total number of kilobytes that were sent to people visiting your site. Bandwidth includes all resources requested by the users.

**Hits** - A hit represents a request to your web site for a file such as an image, a web page, or a CGI script. One web page may contain several related resources, and as a result, a visitor viewing one web page may trigger several hits. Hits generated as a result of an error (either a 400 or 500 level error) are not counted as actual hits to your site, and are kept separate from successful hits.

**Page Views** - A page view is a successful request for a file on your web site that is considered to be a page. These usually mean files with extensions such as .txt, .asp, .aspx, .php, etc. Views generated as a result of an error (either a 400 or 500 level error) are not counted as actual views for your site, and are kept separate from successful views.
