

# Step 2: Install SmarterStats

Help Documentation

## Step 2: Install SmarterStats

Run the InstallShield Wizard. Please refer to the KB article [How To - Install SmarterStats](#) for step-by-step installation instructions. Note: If SmarterStats Enterprise edition will be installed on a remote server, use the service MSI installer package instead of the standard installer. Also, users of Windows 2003 Advanced Server need to install SmarterStats from Add/Remove Programs in the control panel to properly set file permissions.
