Top Dynamic Pages

This report displays the most frequently viewed dynamic pages (webpages that change content based on database information or user settings) on your website. An important step in optimizing the performance of your website is to identify the most commonly accessed dynamic pages and speed up the script execution on those pages.

Note: This report can be added as a report item to a custom report. It may also be used in the creation of standard reports. For more information on report items, refer to [Understanding Report Items](#) .

For a definition of the terms listed on this page, please refer to the [Glossary](#) .
