Hourly Averages

This report displays the average hourly breakdown of your website activity (page views, visits, hits, and bandwidth) for the selected date range. Site administrators and users can use this report to predict bandwidth usage or to set metering policies.

Note: This report can be added as a report item to a custom or favorite report. It may also be used in the creation of standard reports. For more information on report items, refer to [Understanding Report Items](#) .

For a definition of the terms listed on this page, please refer to the [Glossary](#) .
