Sitemap

To help boost the ranking of portal pages in search engine results, administrators can submit the portal's sitemap to search engines.

To access this section, click the settings icon . Then expand the System Settings and Portal folders and click Sitemap in the navigation pane. The sitemap settings will load in the content pane and the following fields will be available:

- Search Engine - To specify which search engine to submit the portal sitemap to, select the appropriate option from the list.
- Brand - The brand to which the sitemap is assigned.
- URL - The URL of the portal sitemap XML file. Note: This URL is automatically generated by SmarterTrack.
